4/11	OP	Arkansas Derby	9.0	American Pharaoh	+81	+71	5.4	81
4/11	Kee	Lexington	8.5	Divining Rod	-212	-42	3.2	7

BIAS - indicates whether a racing surface favored speed versus stretch runners. Large negative BIAS figures denote a speed bias. Large positive BIAS figures indicates a surface putting speed at a disadvantage.

FLOW - indicates whether the race shape favored speed versus stretch runners. Large negative FLOW figures denote a speed favoring scenario. Large positive FLOW figures denote scenarios favoring a deep closer.

BL12 - indicates the number of lengths the winner raced from the lead at the first two calls, combined. A wire to wire winner receives a figure of 0.0. A winner 6 lengths back at the first call and 3½ back at the second call receives a figure of 9.5.

CFR (closer favorability ratio) - combines the independent effects of BIAS and FLOW into a single figure indicating whether the race favored speed versus closers. The CFR ranges from a low of 1 (most speed favoring) to 100 (best for stretch runners).
